Schools that Learn: A Fifth Discipline Fieldbook for Educators, Parents and Everyone who Cares about Education, Nelda Cambron-McCabe, Timothy Lucas, Bryan Smith, Janis Dutton, 2012, 0385518226, 9780385518222. "A rich, much-needed remedy for the standardized institutions that comprise too much of our school system today... ideal for teachers and parents intent on resurrecting and fostering students' inherent drive to learn...An essential resource." -Daniel H. Pink, author of DRIVE and A WHOLE NEW MIND "Schools that Learn is a magnificent, grand book that pays equal attention to the small and the big picture - and what's more integrates them. There is no book on education change that comes close to Senge et al's sweeping and detailed treatment. Classroom, school, community, systems, citizenry---it's all there. The core message is stirring: what if we viewed schools as a means of shifting society for the better!" -Michael Fullan, author of Change Leader and Learning Places

A new edition of the groundbreaking book that brings organizational learning and systems thinking into classrooms and schools, showing how to keep our nation's educational system competitive in today's world. Revised and updated - with more than 100 pages of new material - for the first time since its initial publication in 2000 comes a new edition of the seminal work acclaimed as one of the best books ever written about education and schools. A unique collaboration between the celebrated management thinker and Fifth Discipline author Peter Senge and a team of renowned educators and organizational change leaders, Schools that Learn describes how schools can adapt, grow, and change in the face of the demands and challenges of our society, and provides tools, techniques and references for bringing those aspirations to life. The new revised and updated edition offers practical advice for overcoming the many challenges that face our communities and educational systems today. It shows teachers, administrators, students, parents and community members how to successfully use principles of organizational learning, including systems thinking and shared vision, to address the challenges that face our nation's schools. In a fast-changing world where school populations are increasingly diverse, children live in ever-more-complex social and media environments, standardized tests are applied as overly simplistic "quick fixes," and advances in science and technology continue to accelerate, the pressures on our educational system are inescapable. Schools That Learn offers a much-needed way to open dialogue about these problems - and provides pragmatic opportunities to transform school systems into learning organizations. Drawing on observations and advice from more than 70 writers and experts on schools and education, this book features: -Methods for implementing organizational learning and explanations of why they work -Compelling stories and anecdotes from the "field" - classrooms, schools, and communities -Charts, tables and diagrams to illustrate systems thinking and other practices -Guiding principles for how to apply innovative practices in all types of school systems -Individual exercises useful for both teachers and students -Team exercises to foster communication within the classroom, school, or community group -New essays on topics like educating for sustainability, systems thinking in the classroom, and "the greatgame of high school." -New recommendations for related books, articles,
videotapes and web sites - And more Schools That Learn is the essential guide for anyone who cares about the future of education and keeping our nation's schools competitive in our fast-changing world.

Since publication of the first edition in 1974, Film Theory and Criticism has been the most widely used and cited anthology of critical writings about film. Extensively revised and updated, this sixth edition highlights both classic texts and cutting edge essays from more than a century of thought and writing about the movies. Editors Leo Braudy and Marshall Cohen have reformulated the book's sections and their introductions in order to lead students into a rich understanding of what the movies have accomplished, both as individual works and as contributions to what has been called "the art form of the twentieth [and now twenty-first] century." Building upon the wide range of selections and the extensive historical coverage that marked previous editions, this new compilation stretches from the earliest attempts to define the cinema to the most recent efforts to place film in the contexts of psychology, sociology, and philosophy, and to explore issues of gender and race. The sixth edition features several new essays that discuss the impact of digital technology on the traditional conceptions of what films do and how they manage to do it. Additional selections from the important works of Gilles Deleuze round out sections dealing with the theories of such writers as Sergei Eisenstein, Andre Bazin, and Christian Metz, among others. New essays also strengthen sections dealing with the idea of "excess" in film, film spectatorship, the horror genre, and feminist criticism. Film Theory and Criticism, 6/e, is ideal for undergraduate and graduate courses in film theory and criticism.

**Dialogue and armed conflict: negotiating the civil war in El Salvador, Riordan Roett, Frank Smyth**, 1988, 0941700364, 9780941700368.

**Spider Sam and His Drums, Leighton Smith, Lisa Farrugia**, 2008, .

**The Oxford Book of Military Anecdotes, Max Hastings**, 1985, 0192141074, 9780192141071. If anecdotes are marginal notes on the pages of history, these will delight any reader who has ever been moved or entertained by the condition of the soldier. Few fields of human endeavor have inspired so many memorable anecdotes as warfare, from the Bible and
Livy through Gibbon and Froissart, to the imperial wars of the nineteenth century and the world conflicts of the twentieth. This collection of is principally concerned with American and British conflicts, with, as the author says, "occasional forays among the ranks of foreign armies"—notably the Greeks, the Romans, and Napoleon's veterans. Hastings has sought stories that illustrate the military condition through the ages, both on the battlefield and in barracks: comic, eccentric, heroic, tragic. Here are Caesar at the Rubicon and the revolt of the Praetorian Guard; Alexander's horse and Prince Rupert's dog; the legendary Mother Ross enlisting in search of her lost husband in 1693; Evelyn Waugh as the least plausible of commandos; General George S. Patton's good luck charm "Charlie," a lump of lava rock carved into a Hawaiian warrior; and much more. Some of the stories will be familiar to students of military history while others are less well known, but all provide fascinating sidelights to history. Great war stories by Max Hastings, a leading military historian and war correspondent About the Author: Max Hastings is a well-known author specializing in military history. His most recent books include Bomber Command, Battle for the Falklands, and Overlord.

Clifford's Tower and the Castles of York, Derek Frank Renn, 1971, 0116704098, 9780116704092.

The Sonnet, Stephen Regan, 2014, 0192893076, 9780192893079. The Sonnet provides a comprehensive study of one of the oldest and most popular forms of poetry, widely used by Shakespeare, Milton and Wordsworth, and still used today by poets such as Seamus Heaney, Tony Harrison and Carol Ann Duffy. This book traces the development of the sonnet from its origins in medieval Italy to its widespread acceptance in modern Britain, Ireland and America. It shows how the sonnet emerges from the aristocratic courtly centres of Renaissance Europe and gradually becomes the chosen form of radical political poets such as Milton. The book draws on detailed critical analysis of some of the best-known sonnets written in English to explain how the sonnet functions as a poetic form, and it argues that the flexibility and versatility of the sonnet have given it a special place in literary history and tradition.

Healing the Heart, Healing the Body: A Spiritual Perspective on Emotional, Mental, and Physical Health, Guides (Spirit), Ronald Barry Scolastico, 1992, 1561700398, 9781561700394.

Think Again: Why Good Leaders Make Bad Decisions and how to Keep it from Happening to You, Sydney Finkelstein, Jo Whitehead, Andrew Campbell, 2008, 1422126129, 9781422126127. We've all watched smart, experienced leaders make flawed even catastrophic decisions. How can the risks be reduced? And how can you be sure that you're making the right decisions? In this fascinating and instructive book, Sydney Finkelstein, Jo Whitehead, and Andrew Campbell each a distinguished expert on strategy and decision-making in large organisations - show how the usually beneficial processes of the human mind can become traps. Experience and emotion can create hidden conflicts, even while were striving for
objectivity. The imbalance may cause us to make a bad decision even though we think we are being objective. Think Again provides a new model to help us make better decisions. With vivid stories ranging across industries and disciplines, the authors deconstruct bad decisions and identify the forces that have produced them. They go on to show you how to recognize the condition red flags under which good decision making is most likely to falter, and offer a way of selecting safeguards that reduce the risk and ensure better outcomes. There is no guarantee for perfect decisions. But with Think Again, you can understand the hurdles between you and success, manage to counterbalance their effects, and make better decisions every day.

They Call Me... Montey Greene (Identity Crisis Trilogy, Book 1): Bullets After Breakfast, A. R. Yoba, 2012, 0985440821, 9780985440824. A new badass for the suspense thriller genre. With each release the man from the rough streets of Brownsville, Brooklyn will grow into a legend of mythical proportions. First up is the intro - "They Call Me... Montey Greene." Every legend has a beginning. For Montey it was Europe. A pair of shoes. A beautiful Colombian woman. Pink pills. A false passport. Four bullets in the back. Montey didn't want to die. Not here. Not Now. Not on this cold stretch of highway leading to Lake Como with four bullet holes in his back. Something told him not to go, but he hopped on that plane anyway. All expenses paid they said. First class all the way on an open-ended ticket. You would have taken that flier too if you just got laid off for the third time in as many months and recently separated from your wife. Did I forget to mention the kids? An all expenses paid vacation 4000 miles across the Atlantic, to hang out with some old friends while you try to put the pieces of your crumbling life back together, seemed to be just the remedy for the once again unemployed security systems analyst. Up until the point he walked into that high end women's boutique on Via Della Spiga he was just a regular guy from Brooklyn. That's why he found himself on one of the most touristy fashion corridors in all of Milan. If only he had gone to Venice or Naples instead. Maybe he wouldn't have inadvertently botched the kidnapping of a reputed drug kingpin's daughter. If only it could have been just been that, but Montey Greene didn't have that type of luck. His life as of late wasn't that black and white simple. Now he found himself locked in the cross-hairs of some unknown assailants gun-sight and at the top of some unknown government agency's most wanted list questioning his name. Life is rarely what it seems as perception is usually greater than ones reality. Even a broke clock shows the right time two times a day, so be careful what you wish for. Be careful what you wish for when you take a person's name. Be careful what you wish for if the person you want dead doesn't die.

Play directing: analysis, communication, and style, Francis Hodge, 1971, 0136828159, 9780136828150.

Vendee, Anthony Trollope, 1999, . And The Various Rural Games And Amusements Of Great Britain And America.
full title of this work is Encyclopedia of Rural Sports: Consisting of Shooting, Hunting, Coursing, Fishing, Boating, Racing, Pedestrianism, Cricket, Base Ball, &c. and the Various Games and Amusements of Great Britain and America. Reproduced here in facsimile is the first American edition, which was published by Porter and Coates, Philadelphia, and which is an expansion of the British edition. In his Introduction, Walsh broadly defines rural sports as inclusive of nearly all outdoor pastimes. Perplexingly little can be learned about J. H. Walsh and his voluminous compendium. He is conspicuously absent from the British Dictionary of National Biography and other major references. Nor is the Encyclopedia ... noted in John C. Phillips' comprehensive American Game Mammals and Birds, A Catalogue of Books, 1582 to 1925, Sport, Natural History, and Conservation (1930). We do know that Walsh was English, that he lived from 1810 to 1888, and was bewilderingly knowledgeable about English outdoor sports, many of which he was proficient in, during the 19th century. His work, astonishing in scope and detail, is equally enigmatic.--Henry M. Reeves.

Microwave Noise in Semiconductor Devices, Hans Ludwig Hartnagel, Ramunas Katilius, Arvydas Matulionis, 2001, 0471384321, 9780471384328. A thorough reference work bridging the gap between contemporary and traditional approaches to noise problems Noise in semiconductor devices refers to any unwanted signal or disturbance in the device that degrades performance. In semiconductor devices, noise is attributed to hot-electron effects. Current advances in information technology have led to the development of ultrafast devices that are required to provide low-noise, high-speed performance. Microwave Noise in Semiconductor Devices considers available data on the speed versus noise trade-off and discusses optimal solutions in semiconductors and semiconductor structures. These solutions are of direct interest in the research and development for fast, efficient, and reliable communications systems. As the only book of its kind accessible to practicing engineers, the material is divided into four parts—the kinetic theory of fluctuations and its corollaries, the methods of measurements of microwave noise, low-dimensional structures, and, finally, devices. With over 100 illustrations presenting recent experimental data for up-to-date semiconductor structures designed for ultrafast electronics, together with results of microscopic simulation where available, these examples, tables, and references offer a full comprehension of electronic processes and fluctuation in dimensionally quantizing structures. Bridging the apparent gap between the microscopic approach and the equivalent circuit approach, Microwave Noise in Semiconductor Devices considers microwave fluctuation phenomena and noise in terms of ultrafast kinetic processes specific to modern quantum-well structures. Scientists in materials science, semiconductor and solid-state physics, electronic engineers, and graduate
students will all appreciate this indispensable review of contemporary and future microwave and high-speed electronics. The Concept of Nature, John Torrance, 1992, 0198522754, 9780198522751. In The concept of nature six distinguished authors (three historians of science, philosopher, a mathematician, and a biologist) describe the major phases in the development of scientific conceptions of nature from classical Greece to the present. Professor Geoffrey Lloyd shows how different ideas of nature originated in the polemics of ancient Athens. Alexander Murray analyses medieval conceptions of nature in terms of contrasts between learned and unlearned, between schools of thought, and between Christianity and Greek philosophy. Professor Richard Westfall argues that the essence of the scientific revolution of the seventeenth century was its novel conception of nature, quantified, mechanized, and secularized. Professor Elliott Sober examines ways in which Darwinism undermines teleological thinking in biology. Finally, Professor Roger Penrose makes accessible to the layman the nine basic theories on which modern physics draws in constructing its world-views, while Professor Robert May shows how biological processes can now be investigated, and perhaps controlled, at both the molecular and the population levels.

The Peacemaker's Day Planner 2012, United States Institute of Peace Press (USIP Press), 2011. "The Peacemaker's Day Planner 2012" makes the perfect gift for anyone interested in international relations, history, and world peace. Produced on high-quality, recycled paper with a protective cover and sturdy spiral bind, this popular day planner features quotes and wisdom from renowned peacemakers and literary figures as well as fascinating facts on key moments of peace and conflict resolution. It also includes thirteen detachable full-color postcards of thought-provoking images and artwork on the theme of peace and diplomacy. At 6 1/2" x 8 1/2," the day planner is a fun, informative, and practical way to track appointments with its twenty-seven spacious, biweekly spreads. Major U.S. and international holidays (including holidays in Canada, the U.K. and New Zealand), religious holidays, moon phases, and seasons are indicated. Pages with international dialing codes, world time zones, a table of weights and measures, and extra pages for notes make the planner a particularly useful resource. Created by the United States Institute of Peace (USIP), the 2012 day planner is a tribute to more than twenty-five years of USIP's efforts to prevent, manage, and end violent international conflicts and celebrates the first year in USIP's new headquarters on the northwest corner of the National Mall in Washington, D.C. The headquarters serves as a national hub for research, training, and on-the-ground work in preventing and managing international conflict and allows USIP to address the difficult problems of war and peace using cost-effective and efficient problem-solving approaches."Sample Layout" "Sample Postcard"

But when they change number 7 bus into a magic carpet, who knows what will happen next? Ages 3-6. Gold Winner in the Smarties Book Awards, 5 and under, 2003.

The Haunted, J. A. Templeton, 2012, 1480180505, 9781480180505. After battling a malevolent ghost that held the spirit of her friend Ian MacKinnon bound to the land for two hundred years, sixteen-year-old reluctant psychic Riley Williams felt as if she was finally easing into her new life in Scotland. Or so she thought. Laria, the spirit of the witch who had cursed Ian wants revenge for Riley's interference and she's bringing along friends—dark entities who thrive on evil. The one bright spot in Riley's world is Ian's descendent, Kade MacKinnon, who could easily be Ian's modern day twin. The parallels between the two guys are undeniable. As Riley's relationship with Kade blossoms, she begins to realize Laria has grown in her power since their last confrontation—a power that could very well manipulate the living just as effectively as the dead.

Aunt Killer, Jeneva Johns, 2001, 097113071X, 9780971130715. With her memory failing, ill with viral encephalitis, and injured in a killer planned accident, a woman flees those complicating her life and returns to Florida. Wandering along the ocean, she searches in vain for her childhood home and safety. Finding her sleeping on a sand dune, a former Secret Service agent attempts to find out who tried to kill her by reconstructing her recent past and finds more than he imagined. The more he unravels the clues the more he becomes entangled in her quiet charm. A series of events on the beach draw danger closer and both must face the killer. Jeneva Johns grew up in Daytona Beach, Florida and returned after graduating college in Ohio to teach art in Palatka. In 1997 the author contracted viral encephalitis from a mosquito bite. Johns studied fiction writing at the Ohio State University and with the Writer's Digest School.

**IPv6 Essentials, Silvia Hagen**, 2006, 05965553412, 97805965553418. IPv6 Essentials, Second Edition provides a succinct, in-depth tour of all the new features and functions in IPv6. It guides you through everything you need to know to get started, including how to configure IPv6 on hosts and routers and which applications currently support IPv6. The new IPv6 protocols offers extended address space, scalability, improved support for security, real-time traffic support, and auto-configuration so that even a novice user can connect a machine to the Internet. Aimed at system and network administrators, engineers, network designers, and IT managers, this book will help you understand, plan for, design, and integrate IPv6 into your current IPv4 infrastructure.Beginning with a short history of IPv6, author Silvia Hagen provides an overview of new functionality and discusses why we need IPv6. Hagen also shares exhaustive discussions of the new IPv6 header format and Extension Headers, IPv6 address and ICMPv6 message format, Security, QoS, Mobility and, last but not least, offers a Quick Start Guide for different operating systems. IPv6 Essentials, Second Edition also covers:In-depth technical guide to IPv6Mechanisms and Case Studies that show how to integrate IPv6 into your network without interruption of IPv4 servicesRouting protocols and upper layer protocolsSecurity in IPv6: concepts and requirements. Includes the IPSEC framework and security elements available for authentication and encryptionQuality of Service: covers the elements available for QoS in IPv6 and how they can be implementedDetailed discussion of DHCPv6 and Mobile
IPv6Discussion of migration cost and business case Getting started on different operating systems: Sun Solaris, Linux, BSD, Windows XP, and Cisco routers Whether you're ready to start implementing IPv6 today or are planning your strategy for the future, IPv6 Essentials, Second Edition will provide the solid foundation you need to get started. "Silvia's look at IPv6 is always refreshing as she translates complex technology features into business drivers and genuine end-user benefits to enable building new business concepts based on end to end models." Latif Ladid, President IPv6 Forum, Chair EU IPv6 Task Force

Peaceful Parent, Happy Kids: How to Stop Yelling and Start Connecting, Laura Markham, 2012, 0399160280, 9780399160288. A groundbreaking guide to raising responsible, capable, happy kids. Based on the latest research on brain development and clinical experience with parents, Dr. Laura Markham's approach is as simple as it is effective. Her message: Fostering emotional connection with your child creates real and lasting change. When you have that vital connection, you don't need to threaten, nag, plead, bribe—or even punish. This remarkable guide will help parents better understand their own emotions—and get them in check—so they can parent with healthy limits, empathy, and clear communication to raise a self-disciplined child. Step-by-step examples give solutions and kid-tested phrasing for parents of toddlers right through the elementary years. If you're tired of power struggles, tantrums, and searching for the right 'consequence,' look no further. You're about to discover the practical tools you need to transform your parenting in a positive, proven way. 'Dr. Laura shows parents how their empathy can wire their child's brain for emotional regulation and happiness—and a brighter future for humanity. A simple yet revolutionary message of love.' Nancy Samalin, MS, bestselling author of four books including Loving Without Spoiling 'If you want to feel more confident and peaceful as a parent, this is the book. Dr Laura helps you understand what drives your child's behavior, and gives you the practical tools to change it.' Elizabeth Pantley, bestselling author of twelve books including The No Cry Sleep Solution

Linux Kernel in a Nutshell, Greg Kroah-Hartman, 2006, 0596553455, 9780596553456. Written by a leading developer and maintainer of the Linux kernel, Linux Kernel in a Nutshell is a comprehensive overview of kernel configuration and building, a critical task for Linux users and administrators. No distribution can provide a Linux kernel that meets all users' needs. Computers big and small have special requirements that require reconfiguring and rebuilding the kernel.
Whether you are trying to get sound, wireless support, and power management working on a laptop or incorporating enterprise features such as logical volume management on a large server, you can benefit from the insights in this book. Linux Kernel in a Nutshell covers the entire range of kernel tasks, starting with downloading the source and making sure that the kernel is in sync with the versions of the tools you need. In addition to configuration and installation steps, the book offers reference material and discussions of related topics such as control of kernel options at runtime. A key benefit of the book is a chapter on determining exactly what drivers are needed for your hardware. Also included are recipes that list what you need to do to accomplish a wide range of popular tasks.

The father of cognitive neuroscience and author of Human offers a provocative argument against the common belief that our lives are wholly determined by physical processes and we are therefore not responsible for our actions. A powerful orthodoxy in the study of the brain has taken hold in recent years: Since physical laws govern the physical world and our own brains are part of that world, physical laws therefore govern our behavior and even our conscious selves. Free will is meaningless, goes the mantra; we live in a determined world. Not so, argues the renowned neuroscientist Michael S. Gazzaniga in this thoughtful, provocative book based on his Gifford Lectures—one of the foremost lecture series in the world dealing with religion, science, and philosophy. Who's in Charge? proposes that the mind, which is somehow generated by the physical processes of the brain, constrains the brain just as cars are constrained by the traffic they create. Writing with what Steven Pinker has called his trademark wit and lack of pretension, Gazzaniga shows how determinism immeasurably weakens our views of human responsibility; it allows a murderer to argue, in effect, It wasn't me who did it; it was my brain. Gazzaniga convincingly argues that even given the latest insights into the physical mechanisms of the mind, there is an undeniable human reality: We are responsible agents who should be held accountable for our actions, because responsibility is found in how people interact, not in brains. An extraordinary book that ranges across neuroscience, psychology, ethics, and the law with a light touch but profound implications, Who's in Charge? is a lasting contribution from one of the leading thinkers of our time.

The History of Christian Brothers' College, East St. Kilda, Volume 1, Kathleen Dunlop Kane, Christian Brothers' College, St. Kilda, Victoria, 1972, 0959965203, 9780959965209.

Naming the Antichrist: The History of an American Obsession, Robert C. Fuller, 1995, 0195082443, 9780195082449.

The Antichrist, though mentioned a mere four times in the Bible, and then only obscurely, has exercised a tight hold on popular imagination throughout history. This has been particularly true in the U.S., says author Robert C. Fuller, where

Vector Basic Training: A Systematic Creative Process for Building Precision Vector Artwork, Von R. Glitschka, 2010, 0132490781, 9780132490788. Listen up, designers, and wipe those grins off your faces! Its time to get serious about your design work. For too long youve allowed yourself to go soft, relying on your software to do all of your creative work for you. This book will NOT show you how to use every tool and feature in Adobe Illustrator. This book WILL, however, teach you the importance of drawing out your ideas, analyzing the shapes, and then methodically building them precisely in vector form using the methods covered in this book. In Vector Basic Training, acclaimed illustrative designer Von Glitschka takes you through his systematic process for creating the kind of precise vector graphics that separate the pros
from the toolers and hacks. Along the way, hell whip your drawing skills into shape and show you how to create elegant curves and precise anchor points for your designs. Between the book and the video tutorials on the included DVD, youll be ready for active creative duty in zero hundred hours or less. In Vector Basic Training , youll learn: The tools, plugins, and shortcuts that make up a design pros creative armament How to use The Clockwork Method to create accurate curves every time When and where to set just the right number of anchor points for any design How to build shapes quickly using familiar Illustrator tools Techniques for art directing yourself so that your work gets the response you desire Why symmetry is your friend and how to use it effectively in your designs Available by download: Von Glitschka reports for duty in over an hours worth of video tutorials that walk you through all of the techniques explained in the book. Also included: downloadable art files you can use to follow along on your own. See the instructions for download at the end of your ebook.

Military Commanders: The 100 Greatest Throughout History, Nigel Cawthorne , 2004, 1592700292, 9781592700295. Military history as told through the lives and deeds of warfare's most famous commanders, from ancient Greece through the World Wars, VietNam, and the end of the twentieth century Beginning with Leonides of Sparta, who died at Thermopylae in 480 b.c.e., and ending with General Giap, a Vietnamese leader; Moshe Dayan, commander of the Israeli Defense Force during the 1967 Six-Day War; and Colin Powell, "Military Commanders" provides an informative overview of the careers and battles of one hundred military commanders and their places in history. Divided by eras, the material covers the ancient world, the Anglo-Saxons and the Vikings, the Middle Ages, the Napoleonic period, the American War of Independence and the Civil War, the two World Wars, and the postwar conflicts. Each entry provides a chronology of major events as well as a summary of achievements. The entries, both fascinating and easy to read, succeed in providing a clear yet nuanced picture of the role of the individual in historical events. An engaging and thought-provoking book, full of facts, pertinent quotations, and anecdotes, "Military Commanders" is sure to prove of interest to a wide range of readers. Nigel Cawthorne has a degree from University College, London. He has written, contributed to, and edited more than sixty books including, " Fighting Them on the Beaches: D-Day, 6 June 1944"; Turning the Tide: Decisive Battles of the Second World War"; and "The Encyclopedia of World Terrorism." His work has appeared in over one hundred and fifty newspapers and magazines on both sides of the Atlantic. Military history as told through the lives and deeds of warfare's most famous commanders, from ancient Greece through the World Wars, VietNam, and the end of the twentieth century Beginning with Leonides of Sparta, who died at Thermopylae in 480 b.c.e., and ending with General Giap, a Vietnamese leader; Moshe Dayan, commander of the Israeli Defense Force during the 1967 Six-Day War; and Colin Powell, "Military Commanders" provides an informative overview of the careers and battles of one hundred military commanders and their places in history. Divided by eras, the material covers the ancient world, the Anglo-Saxons and the Vikings, the Middle Ages, the Napoleonic period, the American War of Independence and the Civil War, the two World
Wars, and the postwar conflicts. Each entry provides a chronology of major events as well as a summary of achievements. The entries, both fascinating and easy to read, succeed in providing a clear yet nuanced picture of the role of the individual in historical events. An engaging and thought-provoking book, full of facts, pertinent quotations, and anecdotes, "Military Commanders" is sure to prove of interest to a wide range of readers.

Human Brain Anatomy in Computerized Images, Hanna Damasio, 2005, 0195165616, 9780195165616. Modern tomographic scans are revealing the structure of the human brain in unprecedented detail. This spectator progress, however, poses a critical problem for neuroscientists and practitioners of brain-related professions: how to find their way in the current tomographic images so as to identify a particular brain site, be it normal or damaged by disease? The problem is made all the more difficult by the large degree of individual neuroanatomical variation. Prepared by a leading expert in advanced brain-imaging techniques, this unique atlas is a guide to the localization of brain structures that illustrates the wide range of neuranatomical variation. It is based on the analysis of 29 normal brain obtained from three-dimensional reconstructions of magnetic resonance scans of living persons. It also provides 177 section (coronal, axial, and parasagittal) of one of those brains so that the same structure presented in the section obtained in one incidence can be identified in the section of another incidence. An additional 209 sections of two incidences of two other brains with different overall configurations are included at the same incidences, so that readers can become familiar with the variability of standard images prompted by different skull shapes. Forty-six normal brains, segmented in to the major lobes, are also included. The atlas is based on a voxel-rendering technique developed in the author's laboratory that permits the reconstruction of the brain in three dimensions. The technique permits the identification of major sulci and gyri with about the same degree of precision that can be achieved at the autopsy table. The volume contains 50 pages of color illustrations. The Second Edition of this atlas offers entirely new images, all from new brain specimens. Like the first edition, it will prove to be an essential tool for neurologists, neurosurgeons, neuroradiologists, psychiatrists, and neuroscientists, as well as medical and neuroscience students.

*John Fowler: Prince of Decorators, Martin Wood, Martin A. Wood*, 2007, 071122711X, 9780711227118. John Fowler was an interior decorator who set fashions and changed tastes. The English country house style, which he developed with Sibyl Colefax and Nancy Lancaster, his partners in the firm of Colefax & Fowler, has proved a source of continuing inspiration to decorators and home-owners on both sides of the Atlantic and indeed across the world. Today, a hundred years after his birth, his influence is almost as powerful as it was in the mid 20th century, when he was working on many of Britain's finest and most famous houses, including Uppark, Chequers and Buckingham Palace, as well as dozens of more modest projects. Fowler's style has been so widely imitated that it is easy to forget what an innovator he was. In the 1930s and 1940s his style was a breath of fresh country air, sweeping away heavy velvets and damasks in favour of crisp cotton chintzes, replacing glossy mahogany with painted Regency furnishings, elaborate porcelain and glitzy ormolu with modest pottery and painted tin. Even after the war, when he came to specialize in the decoration of architecturally important interiors, he continued to prefer 'humble elegance' and 'romantic disrepair' to pomposity.

*Cross Stitch Collection - Polar Bears & Penguins*, 2005, 0715320408, 9780715320402. This series of cross-stitch chart books brings together the work of your favourite cross stitch designers. Each title in the series contains 10 pages of charted cross stitch designs on one popular subject. Every chart includes an easy-to-use key, and an inspirational colour photograph of each finished piece shows the fantastic results to be achieved. Each chart book also provides handy stitching tips and advice, stitch diagrams, guidance on techniques and materials, and a thread conversion chart to ensure you have all the information required to complete every design featured. From the biggest polar bear to playful penguins, arctic life is evoked through these two very different creatures. A polar bear mother stands watch over her cubs as they rest on an Arctic ice flow, while another cub and his mother take a stroll together through the snow.

The Eye of the Prophet, Kahlil Gibran, 2008, 1556436971, 9781556436970. The Eye of the Prophet is a luminous collection of Gibran's writings translated from Arabic into French and now into English. Here the author is the poetic, philosophical moralist, grounded in Islam, Buddhism, and Christianity, seeking the best in people, refusing to separate humankind from the natural world. Ordinary work and life, he says, has the potential to be inherently noble, if we can learn to enact our affairs with the sublimity of nature's creations. Gibran's descriptions celebrate the dignity and freedom of animals, birds, the seasons, oceans, clouds. His is a poet's eye; he abhors the tentacles of government and calls on citizens to question all ideologies. In this book he writes about life's great moments and passages (The First Kiss, The First Glance, The Mystery of Love, Youth); eternal essences (Earth, The Nature of Woman, Marriage, Love, Truth, Poetry), and grapples with nationalism, religion, and spiritual growth. The Eye of the Prophet blends Christian, Muslim, and Buddhist ideals into a great spiritual tapestry that transcends all cultural divisions. With its vibrant, rhythmic language, it speaks to our challenging times as a worthy companion to The Prophet.

High temperature superconductors: processing and science, A. Bourdillon, N. X. Tan Bourdillon, 1994, 0121176800, 9780121176808. After six years of one of the most concentrated worldwide research efforts devoted to a single material, high-temperature superconductors are now entering the market as useful products. This book provides an introduction to superconductivity, with an emphasis on the state-of-the-art methods used to process these complex materials. The coverage is complete, with chapters on characterization and applications—both achievable and realized. Through a concise and unified distillation of disparate journal articles and reviews, this book provides a useful handbook for students and researchers alike. High Temperature Superconductors: Processing and Science may be used as a textbook in advanced ceramics and materials science courses; it will also appeal to physicists and chemists who are involved in the synthesis of compounds and specimens, as well as to engineers and applied scientists looking for ways to utilize these remarkable materials. Provides the first book on high-temperature superconductivity written for the applied scientist Emphasizes state-of-the-art processing methods and characterization techniques Carefully illustrates key concepts through the use of tables and figures Links ultimate applications with the materials being described

School's Out, Christophe Dufoss

When a teacher is found dead, having apparently committed suicide, his friend and colleague takes over class 4F and finds himself responsible for a group of subdued, well-behaved but strangely menacing pupils. Assuming their behaviour to be a response to the trauma of the event, Pierre Hoffman at first grants leeway to the precocious class, refusing to embrace the hostility felt by other staff members towards the children. Over the weeks that follow, however, he receives a series of signals and warnings that cause him...
to question the motives of his pupils and the circumstances of his colleague's suicide. Clara Sorman - a pupil known among the staff for having lost her virginity at the age of nine and organising 'special' sex evenings - suggests that Hoffman resign as soon as possible. Then a parcel is delivered to his house, containing a small stuffed toy filled with worms, and he receives anonymous phone calls, a mixture of heavy breathing, hysterical laughter and sinister music. Over the school holidays, Clara Sorman is violently attacked, but she claims to remember nothing about her attackers. Steelfing himself and refusing to believe that the situation can be any more sinister than his suspicious imagination, Hoffman applauds class 4F's decision to organise a school trip to the Normandy coast. Only once the trip has begun, however, does Hoffman begin to understand the extent of their bizarre solidarity and their ultimate goal...

The Oxford companion to the Supreme Court of the United States, Kermit L. Hall, 2005, 0199916462, 9780199916467. This new edition of the Companion has been fully updated and includes new entries on key cases and full treatment of crucial areas of constitutional law, such as abortion, freedom of religion, school desegregation, freedom of speech, voting rights, military tribunals, and the rights of the accused. This is an accessible and authoritative guide, essential for judges, lawyers, academics, journalists, and anyone interested in the impact of the Supreme Court's decisions on American society.

Charles Brittin: West and South, Kristine McKenna, 2011, 3775728368, 9783775728362. Throughout the 1950s, Charles Brittin was the unofficial house photographer for the Beat community that coalesced around the artist Wallace Berman. Brittin settled in Venice Beach, California, in 1951, and his beach shack became a hangout for the Berman circle, which included actors Dean Stockwell and Dennis Hopper, artist John Altoon, curator Walter Hopps and poet David Meltzer, among many others. A self-taught photographer, Brittin was working as a mailman at the time, and spent much of his free time wandering the streets with a camera; he came to know Venice intimately, and his pictures of the town are freighted with a hushed beauty and forlorn sweetness. In the early 1960s the focus of Brittin's life shifted dramatically when he became involved with the civil rights movement. "I suddenly realized I was compelled to do something," Brittin recalls, "because the times demanded it." As a photographer for the Congress of Racial Equality, Brittin documented the
dramatic non-violent protests that occurred throughout Southern California, and made a courageous trip to the deep South, in 1965, to assist with the registration of black voters. As the 60s progressed he documented the antiwar movement, and by the end of the decade was devoting most of his time to the Black Panther Party. These two very different social revolutions are at the heart of Charles Brittin: West and South. With 150 images--138 of them previously unpublished--this monograph is published on the occasion of a 2011 retrospective at Michael Kohn Gallery in Los Angeles. Charles Brittin (born 1928) moved to California from Cedar Rapids, Iowa, after enrolling at UCLA. He contributed several photographs to Wallace Berman's Seminamagazine throughout the 50s and 60s, while working as a photographer for Charles and Ray Eames. After a two-decade hiatus, Brittin returned to photography in the 1990s, also making video works.

Defines key self-decision situations that a young child needs to know and discuss with a parent and presents situations where children can apply and think about how their healthy decisions affect them as well as other people.

T is for T.Rex: Some of Gods Most Amazing Creatures from A to Z is a beautifully illustrated childrens book designed to help kids learn about dinosaurs in a fresh, fun and informative way. While they study the alphabet, T is for T.Rex endeavors to expose young minds to these terrible lizards and other fantastic animals from the fossil record from a biblical point of view. Author Terry P. Beh is a Christian writer and editor, who has participated in numerous creation science dinosaur digs, serving as a dig supervisor on many of them. Terrys hands-on experience excavating dinosaur bones has only confirmed his faith in God as the Creator of all things and in the biblical record of creation. In order to give parents an alternative to evolutionary explanations of these things, with T is for T.Rex he partnered with illustrator Dan Sorensen to tell the other side of the story in a captivating and compelling way. While evolutionary science typically claims that dinosaurs went extinct 65 million years ago, T is for T.Rex presents them as being created by God just a few thousand years ago during Creation Week. And, contrary to the large doses of speculation, imagination and artistic license evolutionists commonly use to describe how these creatures lived, this book cites the Bible as the most faithful reference for what we can know about their behavior. Written from a young-earth creationist perspective, T is for T.Rex stresses the importance of Gods Word in interpreting the fossil evidence for these amazing creatures and points to Noahs Flood as the key to understanding Earths geology and the fossils it contains. Containing funny rhymes, humorous illustrations and factual information, T is for T.Rex is generally aimed at children between the ages of 5 and 12. However, adults will also enjoy reading this book and are likely to learn some new facts about many of the most popular and not-so-popular megafauna (giant animals) from Earths history themselves. In a very real sense, T is for T.Rex could be called a childrens book for adults! Through its creative combination of humor and facts, parents can build their childs faith and
have fun learning together as they read T is for T.Rex to their kids!

**Bringing Chemistry to Life: From Matter to Man, Robert Joseph Paton Williams, J. J. R. Frasto da Silva**, 1999, 0198505469, 9780198505464. In this book, the authors describe the long journey from formless inanimate matter to man, explaining the nature and the logic of the physical-chemical processes involved. It stresses the limitations of reductionism analyses of these processes as complexity increases and novel properties emerge. And, in particular, the authors develop the idea that it was chemical change of the environment that allowed evolution of life to occur and that this evolution required successive addition of new message systems and information codes connected, compatible, and cooperative with previous extant systems. In doing so, the authors analyze the relationship between chemical element content and speciation both in inanimate and living systems in terms of fundamental units and variables or composite (derived) units and variables. Through such analysis, the authors conclude that chemical speciation is very much a matter of chemical cooperation (order versus disorder) while biological speciation requires cooperative flow of chemicals and energy (organization versus disorder). They argue that chance mutations of DNA are far too simple to provide a basis for evolution and biological diversity, though it is a representation of such diversity. It is the survival strength of systems of molecular machinery which separate and generate living species. In the final chapter, they analyze the effect of man's activities on the present global and local ecosystems and speculate on the possible nature of the emergent properties to be expected from an ever-increasing complexity of information based modern societies.

**Football Dynamo: Modern Russia and the People's Game, Marc Bennetts**, 2009, 0753515717, 9780753515716. In 1991, the collapse of the USSR seems to signal the death of the Russian football industry, as the money, the players and the fans left. But now, with oil prices at a record high, the oligarchs who profited from the post-Soviet turmoil are supporting the nation's football clubs and their dreams of glory, resulting in unprecedented success. Along this journey into the heart of Russian football, Marc Bennetts meets the managers, oligarchs, players, pundits and fans that define the Russian Premier league, now the fastest-growing and most intriguing football league in the world. From Andrei Arshavin and the national team’s adventures at Euro 2008 to the symbolism of a club from war-torn Chechnya lifting the Russian FA Cup, Football Dynamo uncovers shocking revelations about corruption, hooliganism and racism, but also the true beauty of the game and the country.

**The Iron Woman, Ted Hughes**, 2005, 0571226132, 9780571226139. The Iron Woman has come to take revenge on mankind. Full of the power and fantastic imagination of his book The Iron Man, this sequel from the late Poet Laureate is a cry against the relentless pollution of the Earth's waterways through the dumping of industrial waste.

Undaunted: My Struggle for Freedom and Survival in Burma, Zoya Phan, 2010, 1439134731, 9781439134733. Once a royal kingdom and then part of the British Empire, Burma long held sway in the Western imagination as a mythic place of great beauty. In recent times, Burma has been torn apart and isolated by one of the most brutal dictatorships in the world. Now, Zoya of the, a young member of the Karen tribe in Burma, bravely comes forward with her astonishingly vivid story of growing up in the idyllic green mansions of the jungle, and her violent displacement by the military junta that has controlled the country for almost a half century. This same cadre has also relentlessly hunted Zoya and her family across borders and continents. Undaunted tells of Zoyas riveting adventures, from her unusual childhood in a fascinating remote culture, to her years on the run, to her emergence as an activist icon. Named for a courageous Russian freedom fighter of World War II, Zoya was fourteen when Burmese aircraft bombed her peaceful village, forcing her and her family to flee through the jungles to a refugee camp just over the border in Thailand. After being trapped in refugee camps for years in poverty and despair, her family scattered: as her father became more deeply involved in the struggle for freedom, Zoya and her sister left their mother in the camp to go to a college in Bangkok to which they had won scholarships. But even as she attended classes, Zoya, the girl from the jungle, had to dodge police and assume an urban disguise, as she was technically an illegal immigrant and subject to deportation. Although, following graduation, she obtained a comfortable job with a major communications company in Bangkok, Zoya felt called back to Burma to help her mother and her people, millions of whom still have to live on the run today in order to survive. In fact, more villages have been destroyed in eastern Burma than in Darfur, Sudan. After a plot to kill her was uncovered, in 2004 Zoya escaped to the United Kingdom, where she began speaking at political conferences and demonstrations. A mission made all the more vital by her fathers assassination in 2008 by agents of the Burmese regime. Like Ayaan Hirsi Ali, Zoya has become a
powerful spokesperson against oppressors, undaunted by dangers posed to her life. Zoyas love of her people, their land, and their way of life fuels her determination to survive, and in Undaunted she hauntingly brings to life a lost culture and world, putting faces to the stories of the numberless innocent victims of Burmas military

Nature's Nutrition: A Comprehensive Resource Guide for Super Foods, Natural Supplements and Preventative Health, Rory M. Celmin, 2011, 0984018611, 9780984018611. This informative health reference highlights the most nutritious super foods, natural supplements, spices & herbs, and reveals their extensive health benefits. It includes the most popular food pyramids, addresses the mercury content of fish and shellfish as well as the pesticide content found on produce. This book also uncovers the truth about tap water, explains the pH of food as well as the importance of organic farming. Nutrition is the foundation of good health, and the quality of the foods we eat will have a lifelong impact. Nature provides us with an abundance of wholesome nutrition. The choice is yours. The time is now!

Defending the Good News: The Jehovah's Witnesses' Plan to Expand the First Amendment, Jennifer Jacobs Henderson, 2010, 092299384X, 9780922993840. The Jehovah's Witnesses were the first organized group in America to generate what has been termed "vigilant" or "disciplined" plan of litigation to expand the boundaries of the First Amendment. In a period of 15 years, Watchtower Bible and Tract Society lawyers won Witnesses the right to distribute literature door-to-door, on public streets and on streets owned by private corporations and the federal government; the right to carry out these activities without first securing a permit or paying a tax; the right to use sound-amplifying equipment to spread
their beliefs; and the right to be protected from continued arrests under unconstitutional ordinances. By implementing an extensive, detailed legal plan to overturn ordinances that interfered with their evangelical mission, the Watchtower Bible and Tract Society broadened protection under the First Amendment not just for their members, but for all Americans. The overwhelming success of the plan shaped mass media law, the application of the First Amendment, and group litigation in the United States. This book explores these issues and examines the Jehovah's Witnesses' plans to expand the First Amendment even further.

**Graha Sutras, Ernst Wilhelm**

**Katrina Tells Jamie about John's Invisible Lesson, Geraldine M. Paulette Bennett**

**Iron John: A Book about Men, Robert Bly**

In this deeply learned book, poet and translator Robert Bly offers nothing less than a new vision of what it is to be a man. Bly's vision is based on his ongoing work with men and reflections on his own life. He addresses the devastating effects of remote fathers and mourns the disappearance of male initiation rites in our culture. Finding rich meaning in ancient stories and legends, Bly uses the Grimm fairy tale "Iron John," in which the narrator, or "Wild Man," guides a young man through eight stages of male growth, to remind us of archetypes long forgotten—images of vigorous masculinity, both protective and emotionally centered. Simultaneously poetic and down-to-earth, combining the grandeur of myth with the practical and often painful lessons of our own histories, Iron John is a rare work that will continue to guide and inspire men-and women—for years to come.

Academic Listening Encounters: Life in Society Teacher's Manual: Listening, Note Taking, and Discussion, Kim Sanabria, 2004, 0521754844, 9780521754842. The Academic Encounters series uses a sustained content approach to teach skills necessary for taking academic courses in English. There are two books for each content area. The Teacher's Manual for this title contains general teaching guidelines for the course, task by task teaching suggestions, answers for all tasks, lecture quizzes and quiz answers, and the listening script for the audio program.

The Imaginary Veterinary: The Rain Dragon Rescue: Number 3 in series, Suzanne Selfors, 2014, 140552328X, 9781405523288. Ben and Pearl are back at Dr Woo's, eager to spend another day working with imaginary creatures! When Mr Tabby directs them to the roof, they finally have a chance to meet the reclusive dragon that's been hiding out at the hospital - and that Ben and Pearl had spotted flying over Buttonville on Ben's first day in town. But all too soon, they're summoned to the basement, to the hospital's portal into the Imaginary World. A call for help has come in, and with Dr Woo away, Ben and Pearl are the only ones who can respond. Their mission: to rescue the rain dragon and uncover the identity of a poacher who's found a way to enter the Imaginary World. What does this mean for Dr Woo and her mythical creatures? Only time will tell. Luckily, Ben and Pearl are up for the challenge!

A Red Dawg's Tale, , 2011, .

America's hidden treasures: exploring our little-known national parks, National Geographic Society, 1997, 0792270339, 9780792270331. Relax. Linger over the national parks you'll visit in this book. Seven maps and 129 photographs will take you there. In the northern Cascade Range in Washington State, you'll hike amid snowy crags and alpine meadows. In Minnesota's Voyageurs National Park, you'll cruise among lakes once plied by fur trappers. In the badlands of North Dakota, you'll dodge bison, and off California's coast, you'll discover an isolated wildlife haven in the Channel Islands. In the Guadalupe Mountains of Texas, you'll explore an exposed portion of a 400-mile-long marine fossil reef. In Florida,
Monocotyledons: Systematics and Evolution: 2-Volume Set, P. J. Rudall, P. J. Cribb, D. F. Cutler, Professor C. J. Humphries, 1995, 0947643850, 9780947643850. This two-volume set dedicated to Rolf Dahlgren (1932-1986), contains 31 papers presented at an international Monocotyledons: Systematics and Evolution symposium at Kew in 1993. They address systematics, mainly at a family level and above, with the aim of encouraging a new classification of the monocotyledons. Taxon-based papers are interspersed with ones on character analysis, cladistic methods of analysis and character evaluation.

Neris and India's Idiot-proof Diet Cookbook, Bee Rawlinson, India Knight, Neris Thomas, 2009, 0141034866, 9780141034867. In Neris and India's Idiot-Proof Diet Cookbook India Knight and Neris Thomas enlist the help of Bee Rawlinson to create over a hundred low-carb recipes to help you get 'from pig to twig'. Low-carb cooking: a lot of meat with a side order of cream, right? Wrong. How about onion bhajias, sesame stir-fried duck and fabulously retro Black Forest Trifle for pudding? (Yes! Pudding!) Neris & India's Idiot-Proof Diet Cookbook is the least diety diet cookbook you've ever seen. Over a hundred quick-and-easy recipes (including some that need just five ingredients) cover every occasion. Each recipe fits perfectly into the Idiot-Proof Diet and will not only inspire and delight you, but - best of all - will make you shrink like you wouldn't believe. The "Nigella of low-carb" . . . recipes you'll want to gorge on, whether you're following their low-carb plan or not' Scotland on Sunday 'A practical and easy to follow collection of idiot-proof recipes that will inspire you to keep on track with your diet. You'll find recipes for breakfasts, snacks, soups, main meals, treats and desserts. Treat yourself! Easyfood' An easy-to-follow low-carb diet that doesn't mean eating meat three times a day' Woman & Home India Knight is the author of four novels: My Life on a Plate, Don't You Want Me, Comfort and Joy and Mutton. Her non-fiction books include The Shops, the bestselling diet book Neris and India's Idiot-Proof Diet, the accompanying bestselling cookbook Neris and India's Idiot-Proof Diet Cookbook and The Thrift Book. India is a columnist for the Sunday Times and lives in London with her three children. Follow India on Twitter @indiaknight or on her blog at http://indiaknight.tumblr.com. Neris Thomas is a film producer and artist, she lives in London and is married with one daughter. Bee Rawlinson is a mother of four from Devon who came to Neris and India's attention through her delicious recipes on the Pig2Twig forum, the Diet's website.

Hell's Gospel: Pathological Magic, Ernest Johnson, 2013, . Hells Gospel put personality against soul. Personality in this realm is constantly at adds with the needs of the soul, thus creating confusion. Personality is DNA which is mental, psychotic. All things come into question. Personality will not be denied. Hells Gospel is AMF. Pathological Magic is the
result in our lives and it will not be denied. Hells Gospel takes a dive into the underground of human consciousness, deep into the caverns of Pathologic Magic. This material is the wormhole (star gate) to the inner psychological world of black magic.

Clinical Imaging: An Atlas of Differential Diagnosis, Ronald L. Eisenberg, 2010, 0781788609, 9780781788601. Dr. Eisenberg's best seller is now in its Fifth Edition with brand-new material on PET and PET/CT imaging and expanded coverage of MRI and CT. Featuring over 3,700 illustrations, this atlas guides readers through the interpretation of abnormalities on radiographs. The emphasis on pattern recognition reflects radiologists' day-to-day needs...and is invaluable for board preparation. Organized by anatomic area, the book outlines and illustrates typical radiologic findings for every disease in every organ system. Tables on the left-hand pages outline conditions and characteristic imaging findings...and offer comments to guide diagnosis. Images on the right-hand pages illustrate the major findings noted in the tables. A new companion Website allows readers to assess and further sharpen their diagnostic skills.

Multiple light scattering: tables, formulas, and applications, Hendrik Christoffel Hulst, 1980, 0127107010, 9780127107011.

Everything Scrabble: Third Edition, Joe Edley, John D. Williams, Jr., John Williams, 2009, 1416561757, 9781416561750. Newly revised with updated new strategies and words, the classic how-to guide to one of the most popular board games of all time. First introduced to the public in the mid 1950s, Scrabble has gone on to be one of the biggest selling board games in history and is currently gaining legions of new fans in the online world. Offering relevant game tips for both the beginner and the seasoned pro, Everything Scrabble includes basic board strategies, tips for utilizing the letter "Q" (with and without the letter "U"), the latest in high scoring words, a complete list of two-letter words that can to increase players scoring averages by thirty to forty points and much more. Featuring a complete history of the game, this
extensively illustrated guidebook covers all facets of the game and worldwide Scrabble culture including tournaments, champions, and rules and is a must have for every serious fan.

Jazz styles: history & analysis, Volume 2, Mark C. Gridley, 1994, 0131759698, 9780131759695. Key Benefit: This broad and encompassing survey provides a rich, informative, and chronological study of jazz, with insightful commentaries on its origins, and full descriptions of the various styles of jazz and the personalities that have contributed to this innovative form of music. Key Topics: Discussions of benchmark styles with point-by-point differentiation cover early jazz, swing, bop, hard bop, cool jazz, "free" jazz, and jazz-rock fusion--highlighting the musical characteristics of each style and contrasting each successive era. Market: For musicians and non-musicians alike--to increase their appreciation and enjoyment of jazz.

Holy Cow!: An Indian Adventure, Sarah MacDonald, 2010, 1407084399, 9781407084398. After backpacking her way around India, 21-year-old Sarah Macdonald decided that she hated this land of chaos and contradiction with a passion, and when an airport beggar read her palm and insisted she would come back one day - and for love - she vowed never to return. But twelve years later the prophecy comes true when her partner, ABC's South Asia correspondent, is posted to New Delhi, the most polluted city on earth. Having given up a blossoming radio career in Sydney to follow her new boyfriend to India, it seems like the ultimate sacrifice and it almost kills Sarah - literally. After being cursed by a sadhu smeared in human ashes, she nearly dies from double pneumonia. It's enough to send a rapidly balding atheist on a wild rollercoaster ride through India's many religions in search of the meaning of life and death. From the 'brain enema' of a meditation retreat in Dharamsala to the biggest Hindu festival on earth on the steps of the Ganges in Varanasi, and with the help of the Dalai Lama, a goddess of healing hugs and a couple of Bollywood stars - among many, many others - Sarah discovers a hell of a lot more.

A Vindication of the Rights of Woman, Mary Wollstonecraft, 2004, 0141904631, 9780141904634. Writing in an age when the call for the rights of man had brought revolution to America and France, Mary Wollstonecraft produced her own declaration of female independence in 1792. Passionate and forthright, A Vindication of the Rights of Woman attacked the prevailing view of docile, decorative femininity, and instead laid out the principles of emancipation: an equal education for girls and boys, an end to prejudice, and for women to become defined by their profession, not their partner. Mary Wollstonecraft's work was received with a mixture of admiration and outrage - Walpole called her 'a hyena in petticoats' - yet it established her as the mother of modern feminism.

The Newfoundland, Carol Cooper, 1989, 0950567426, 9780950567426.

The Language and Literature Reader, Peter Stockwell, 2008, 0415410037, 9780415410038. The Language and Literature Reader is an invaluable resource for students of English literature, language, and linguistics. Bringing together the most significant work in the field with integrated editorial material, this Reader is a structured and accessible tool for the student and scholar. Divided into three sections, Foundations, Developments and New Directions, the Reader provides an overview of the discipline from the early stages in the 1960s and 70s, through the new theories and practices of the 1980s and 90s, to the most recent and contemporary work in the field. Each article contains a brief introduction by the editors situating it in the context of developing work in the discipline and glossing it in terms of the section and of the book as a whole. The final section concludes with a 'history and manifesto', written by the editors, which places developments in the area of stylistics within a brief history of the field and offers a polemical perspective on the future of a growing and influential discipline.

Ruth, Elizabeth Cleghorn Gaskell, 2008, 0199538247, 9780199538249. One of the less familiar of Mrs. Gaskell's novels, Ruth was in its own time a cause celebre which not only contributed substantially to its author's growing reputation but also won the approval of a number of her distinguished contemporaries. The text used for this edition is based upon that of the first edition published in 1853. About the Series: For over 100 years Oxford World's Classics has made available the broadest spectrum of literature from around the globe. Each affordable volume reflects Oxford's commitment to scholarship, providing the most accurate text plus a wealth of other valuable features, including expert introductions by leading authorities, voluminous notes to clarify the text, up-to-date bibliographies for further study, and much more.

Lest We Forget--: In Memory of Those Men & Women from the Alliance Area who Served in the Wars, Royal Canadian Legion, Alliance Branch, #94, 2007, 0969986335, 9780969986331.

Unleashing Multiplan, Daniel Sueltz, Bruce Kinder, 1985. Designed to Help Users Solve Financial Problems; Allows Users to Create Listing Templates Which Form Models for Analyzing & Calculating

Native voices: American Indian identity and resistance, Richard A. Grounds, George E. Tinker, David Eugene Wilkins, 2003, 0700612580, 9780700612581. Native peoples of North America still face an uncertain future due to their unstable political, legal, and economic positions. Views of their predicament, however, continue to be dominated by non-Indian writers. In response, a dozen Native American writers here reclaim their rightful role as influential "voices" in the debates about Native communities at the dawn of a new millennium. These scholars examine crucial issues of politics, law, and religion in the context of ongoing Native American resistance to the dominant culture. They particularly show how the writings of Vine Deloria, Jr., have shaped and challenged American Indian scholarship in these areas since the 1960s. They provide key insights into Deloria's thought, while introducing some of the critical issues still confronting Native nations today. Collectively, these essays take up four important themes: indigenous societies as the embodiment of cultures of resistance, legal resistance to western oppression against indigenous nations, contemporary, Native religious practices, and Native intellectual challenges to academia. Individual chapters address indigenous perspectives on topics usually treated (and often misunderstood) by non-Indians, such as the role of women in Indian society, the importance of sacred sites to American Indian religious identity, and the relationship of native language to indigenous autonomy. A closing essay by Deloria--in vintage form--brings the book full circle and reminds Native Americans of their responsibilities and obligations to one another--and to past and future generations. Ranging from insights into Native American astronomy to critiques of federal Indian law, this book strongly argues for the renewed cultivation of a Native American Studies that is much more Indian-centered. Without the revival of that perspective, such curricula are doomed to languish as academic ephemera--missed opportunities for building a b

The Privileges and Immunities of International Organizations in Domestic Courts, August Reinisch, 2013, 0199679401, 9780199679409. International organizations are increasingly operating across borders and engaging in legal transactions in virtually all jurisdictions. This makes, familiarity with the applicable law and practice imperative for both international organizations and those who engage in legal relations with them. Furthermore, the issue of whether, how, and to what extent domestic courts take into account decisions of foreign and international courts and tribunals in their own decision-making has become increasingly important in recent years. This book provides a comprehensive empirical study of this transnational judicial dialogue, focusing on the law and practice of domestic jurisdictions concerning the legal personality, privileges, and immunities of international organizations. It presents a selection of detailed country-by-country studies,
examining the manner of judicial dialogue across domestic jurisdictions, and between national and international courts. The approach taken in this book intersects with three highly topical areas of international legal scholarship: the rapidly evolving law of international institutions; the burgeoning research into the role of domestic courts in the international legal system; and the recent rise of empirically-oriented legal scholarship. Utilizing OUP's International Law in Domestic Courts database, the book presents analysis of little-known cases which have real international significance, illustrating the impact and extent of transnational judicial dialogue in the international legal system. The book provides important perspectives on the evolution and status of the law of immunity of international organizations, and contributes to the understanding of relationships between national courts, and between national and international courts.

Glasses and Glass Ceramics for Medical Applications, Emad El-Meliegy, Richard van Noort, 2011, 1461412285, 9781461412281. Glass ceramics are a special group of materials in which a base glass can be crystallized under carefully controlled conditions, which in turn determine the properties of the material. These materials offer a wide range of physical and mechanical properties combining the distinctive characteristics of sintered ceramics and glasses. This book provides readers with an interest in medical ceramics with the ability to start making their own glasses and glass ceramics, together with an understanding of the various factors that control the final properties of these medical and dental materials. In addition, the authors describe various industrial problems with current, clinically-used medical glass ceramics and discuss appropriate scientific solutions. Glasses and Glass Ceramics for Medical Applications will appeal to a broad audience of biomaterials scientists, ceramists, and bioengineers, particularly those with an interest in orthopedic and dental applications, as well as scientists and engineers involved in the manufacture of glasses, glazes, enamels, and other glass coatings for the medical materials industry. The book will also be of interest to undergraduate and graduate students in materials engineering and dentistry, and is suitable for use in courses on medical and dental materials.

The Trouble with Medicine, Melvin Konner, 1993, 0140238697, 9780140238693. The world is in the midst of a medical revolution which is challenging basic assumptions about science and the practice of medicine. Dramatic scientific progress promises better health and longer life, but also creates profound problems.

The Walking Dead: A Continuing Story of Survival Horror. Book 6, Robert Kirkman, 2010, 1607063271, 9781607063278. Police officer Rick Grimes, still struggling to keep his group of survivors alive in the wake of a zombie apocalypse, is aware they are being tracked, which makes him understandably cautious when a priest stumbles into their camp, and they continue their journey to Washington, D.C., hoping to find civilization, only to be offered homes, community, and a stable life in an apparently stable safe zone.

Relativity Made Relatively Easy, Andrew M. Steane, 2012, 0191650420, 9780191650420. Relativity Made Relatively Easy presents an extensive study of Special Relativity and a gentle (but exact) introduction to General Relativity for
undergraduate students of physics. Assuming almost no prior knowledge, it allows the student to handle all the Relativity needed for a university course, with explanations as simple, thorough, and engaging as possible. The aim is to make manageable what would otherwise be regarded as hard; to make derivations as simple as possible and physical ideas as transparent as possible. Lorentz invariants and four-vectors are introduced early on, but tensor notation is postponed until needed. In addition to the more basic ideas such as Doppler effect and collisions, the text introduces more advanced material such as radiation from accelerating charges, Lagrangian methods, the stress-energy tensor, and introductory General Relativity, including Gaussian curvature, the Schwarzschild solution, gravitational lensing, and black holes. A second volume will extend the treatment of General Relativity somewhat more thoroughly, and also introduce Cosmology, spinors, and some field theory.

**Fundamental statistics for behavioral sciences, Robert B. McCall**, 1994, 0155005723, 9780155005723. As a textbook for the first course in applied statistics, [this book] is used primarily by students majoring in psychology, education, and other behavioral sciences. [The author] emphasize[s] the purpose, rationale, and application of important statistical concepts over rote memorization and the mechanical application of formulas. [This book] does not require much background in mathematics. ... the student need be familiar only with the thinking patterns learned in high school algebra and geometry; all relevant terms and operations are reviewed in Appendix 1. ... the book contains many computations and problems to solve, but most statistical formulas rely heavily on simple arithmetic, addition, subtraction, multiplication, division, and the taking of square roots ... [The book] presents descriptive statistics, inducing central tendency, variability, relative position, regression, and correlation. [It] deals with elementary inferential statistics, including sampling distributions, the logic of hypothesis testing, elementary parametric tests, and simple analysis of variance ... -Pref.

**The Alphabet from A to Y with Bonus Letter Z!, Steve Martin**, 2007, 0385523777, 9780385523776. The acclaimed entertainer and bestselling author Steve Martin and the wildly clever New Yorker cartoonist Roz Chast team up in a weird,
wonderful excursion through the alphabet. The ABCs have never had it so good. Created by two of today’s Wittiest, most imaginative minds, The Alphabet from A to Y with Bonus Letter Z! is a sheer delight from A to Z. In twenty-six alliterative couplets, Steve Martin conjures up much more than mere apples and zebras. Instead we meet Horace the hare, whose hairdo hides hunchbacks, and Ollie the owl, who owed Owen an oboe. Roz Chast contributes the perfect visual settings for Martin’s zany two-liners. Her instantly recognizable drawings are packed with humorous touches both broad and subtle. Each rereading and there will be many delivers new delights and discoveries. There, hidden behind Bad Baby Bubleducks, is a framed picture of a beatnik holding balloons; and the letter C finds clunky Clarissa all clingy and clueless adrift in a landscape cluttered with images ranging from a curiously comfortable clown to Chuck’s Chili stand. A smart, laugh-inducing introduction to the alphabet for young children, The Alphabet from A to Y with Bonus Letter Z! will also enchant adults with its matchless mix of the sophisticated and the silly.

How to Live Off-grid, Nick Rosen, 2008, 0553818198, 9780553818192. Literally, the word 'off-grid' refers to places or people without mains water, power or phone line. Off-grid locations can range from private islands to yurts and tree-houses; the people living there might be back-packers, right wing survivalists, international business travellers or hippies; they may move around in buses or yachts, houseboats or 4-wheel drives. All are outside or inbetween the criss-crossing lines of power, water and phone that delineate the civilised world. Some are trying to save the planet, some live that way because it is all they can afford, some just want the freedom. This book is about that physical sense of off-grid. But it is also about taking the off-grid attitude into your local park or your own back garden. It is part travellogue as Nick Rosen, his wife and baby take off in a camper van to visit off-gridders representing every aspect of living off-grid - part-time and fulltime, on land and water, metaphorical and actual, rural and city. And it is also a guide to avoiding the pitfalls and finding the best solutions - and the most appealing gadgetry - for going off-grid yourself.

Bun-Bun's Garden, , 1992, 0963032844, 9780963032843. The arrival of spring brings a flurry of activity to Bun-Bun's garden. He tills the soil & sows his seeds, eagerly anticipating a delightful harvest. Richard Mosse's charming story leads children on a journey through the growing season, offering them a peek at the joys of gardening.

Eye of the Storm, Jack Higgins , 1998,.

Volcanoes: Mountains That Blow Their Tops, Nicholas Nirgiotis , 1996, 06130000781, 97806130000789. The All Aboard
Reading series features stories that capture beginning readers’ imagination while developing their vocabulary and reading comprehension. The Picture Readers, appropriate for preschoolers, combine a very simple text with rebuses. Flash cards bound in the book help make the transition from the rebus to the printed word. As the levels progress, the stories get longer, and the print size gets smaller, preparing readers for longer books with chapters. All the books are illustrated in full color, and engage a child’s curiosity with a range of topics from science to sports, history, and fantasy. Grades 1 - Grade 3.

Oxford Handbook of Clinical Surgery, Greg R. McLatchie, 2002, 0192626388, 9780192626387. Providing a unique approach to the practice of surgery, this new edition of the Oxford Handbook of Clinical Surgery continues in the tradition of providing a succinct overview of the principles, techniques and procedures of surgery. The content has been fully revised to meet the requirements of modern surgical practice. It is written in the very successful concise style of the handbook series, providing an accessible pocket reference for medical students, housemen, junior surgical trainees, nursing, paramedical and rehabilitation staff. The coverage includes the assessment and preparation of the patient, anaesthesia and critical care, inflammation, wound healing and infection, the key components of general surgical practice as well as chapters on other surgical specialties, including plastic, paediatric and orthopaedic surgery. There are also step by step descriptions of some common operative surgical techniques, practical hints and procedures, and a chapter on signs, symptoms and rarities.

Romare Bearden: a black odyssey, Robert G. O’Meally, Romare Bearden, 2007, . Romare Bearden (1911-1988) had a true Renaissance sensibility. He was a fine artist who also successfully turned his hand to printmaking, writing, costume and set design, as well as composing jazz music. In addition, he helped to found the Studio Museum in Harlem, New York’s Cinque Gallery and the Black Academy of Arts and Letters, and was once even offered an opportunity to play professional baseball for the Philadelphia Athletics. But it is for his rich and textured collages that Bearden is best known today. In 1977, Bearden created a sequence of 20 collages based on episodes from Homer’s Odyssey. It may come as a surprise to even his most avid followers that this devoted chronicler of African American culture and the Harlem Renaissance would gravitate to such a canonical text. But in the essay accompanying Romare Bearden: A Black Odyssey, scholar Robert G. O’Meally argues for their thematic consistency and suggests that, in the figures of Odysseus, Penelope, Poseidon, Nausicaa and others, Bearden found themes sympathetic to the African American experience. These motifs of wandering, mourning and the questing for home--considering Bearden's scores of interiors and exteriors, country and city
life and depictions of family love—emerge as the central themes of all his art. Romare Bearden: A Black Odyssey, the first in-depth consideration of these collages since they were originally exhibited 30 years ago, will prove a surprise to Bearden fans and newcomers alike.

**The Story of Hope**, 2011, 0979708621, 9780979708626.

**The Philo Group, Leta Rose**, 2011, 0979708621, 9780979708626. PHILO is about transforming consciousness from doing what you think, to Being what you Are, by allowing what you Know. PHILO is about forgiveness, and gratitude. PHILO is about the unknowingness of mind and the doubtlessness of Heart.

**Testing and evaluation of infrared imaging systems, Gerald C. Holst**, 2008, 0819472476, 9780819472472. With test methodologies and data analysis techniques that apply to all imaging systems and detector array characterizations, including visible, near infrared, short-wavelength infrared (SWIR), mid-wavelength infrared (MWIR) and long-wavelength infrared (LWIR), Holst has updated this edition to include current practice of capturing the data with a frame grabber for computer analysis. He also clarifies the concept of target background delta-T and updates chapters on noise and modulation transfer function (MTF) measurements. He covers infrared (IR) imaging system operation, IR technology, general measuring techniques, focus and system resolution, system responsivity, system noise, transfer functions (modulation, phase and contrast, geometric transfer function, observer interpretation of image quality, automated testing and uncertainty analysis. Holst builds from basic material to that which is more advanced, making this a suitable for both self-study and the classroom, and his illustrations are well-chosen.

**Gender, Language and Power: Learning Resources, Jeanne Solity**, 1999, 0957746814, 9780957746817. This gender inclusive learning resource was designed to assist trainers to teach learning outcomes and provide suggested activities to support the delivery of adult English language literacy and numeracy.

**Theology and Literature: Rethinking Reader Responsibility, Gaye Williams Ortiz, Clara A.B. Joseph**, 2006, 1403971986, 9781403971982. This collection of new essays by academics from different parts of the world brings refreshing and provocative responses to prominent literary theories, especially theories of the reading process and of reader-response. This edition is significant in three ways: for its encounter with world religions and literatures; its explicit literary cum theological discourse; and its strong focus on the ethics of reading and representation. It boasts an impressive multidisciplinary array of reader-response theories that straddle theological, cultural, and literary boundaries. The essays showcase a combination of theory and hands-on application on literary and cultural texts.
Medical Ethics: A Reader, David Stewart, 1992, 0135724961, 9780135724965. This brief anthology stresses the timeless philosophical issues underlying contemporary medical concerns.

The GRE Test For Dummies, Suzee Vlk, Michelle Rose Gilman, Veronica Saydak, 2012, 0470483105, 9780470483107. A totally effective and surprisingly fun guide to the Graduate Record Examination. In Fall 2007, the GRE Program is planning to implement significant changes to the verbal measure, quantitative measure, and analytical writing sections of the GRE. This easy-to-use, refreshingly irreverent revision shares inside information on what to expect with these changes, helping both recent graduates and workforce veterans prepare for the revised test, maximize their score, and get into the graduate program of their choice. It includes all of the secrets of the Internet-based test (iBT)-in which the computer generates unique questions according to correct or incorrect answers—as well as brush-up reviews on math and grammar, two complete practice tests, and proven time-management techniques that make test-prep fun and simple. Suzee Vlk wrote For Dummies guides to the ACT, SAT, GRE, and GMAT and taught test preparation classes for more than 25 years. Michelle Gilman (Solana, CA) is the founder and CEO of Fusion Learning Center. Veronica Saydak (Solana, CA) is Director of student curricula at Fusion and has been tutoring test preparation at all levels for several years.

Applying Moral Theories, C. E. Harris, 2007, 0495007056, 9780495007050. APPLYING MORAL THEORIES is a unique introduction to the application of major ethical theories to practical concerns. Examining egoism, natural law, utilitarianism, respect for persons, and virtue ethics, the book offers insights into the advantages and difficulties associated with the application of each theory. Putting forth a critical method that encourages students to break down ethical deliberations into four classes of concerns—factual, conceptual, application, and moral?the book's driving claim is that "common morality," or the stock of moral ideas that most people in our culture share, cannot be captured in a single moral theory, but that each of these theories highlights an important aspect of common morality. Thus, it is often useful
to look at the complex moral problem from the standpoint of several theories.

Creating Your Own Future, Julia HASTINGS, 1996.

Beautifully written with joy and pathos, and richly illustrated with fourteen color illustrations, Maltese Crossing: Love, Loss, and Lessons of Compassion exemplifies what it means to have--and then lose unconditional love. At first full of playful humor, poking fun at the human world, a tiny Maltese puppy, Kuan Yin, tells of the relationship. As fate changes, and the dog leaves for another celestial assignment, the author relates the loss with thoughtful reflection on how the beloved companion brought ancient wisdom, the gift of a more fulfilling, meaningful life. When the dog leaves, the human grieves deeply, mourning the loss that seems insurmountable. Reflection on what it means to be truly loved brings honor and respect to animal companions, avatars of heavenly spirits sent to comfort humans. The lesson helps people understand their grief--and their unconditional love--and move forward in gratitude toward a new life and a greater opportunity to do good and noble works in the world. No one escapes loss. Our friends die, our pets leave us, our hopes, dreams, and opportunities elude us, and we all grieve over the great chasm their departure leaves in our hearts. The themes of loss and healing are universal.

New Stories from the South: The Year’s Best, 1989, Shannon Ravenel, 1989, 0945575270, 9780945575276. The long-time editor of Best American Short Stories has selected 15 short stories from and about the American South of today.

Biology of Amphibians, William E. Duellman, 1994, 080184780X, 9780801847806. This is the widely acclaimed, preeminent reference and text on all aspects of amphibian biology, including their life history, ecology, morphology, and evolution. Copiously illustrated with original drawings and photographs and meticulously referenced with more than 2,500 bibliographic entries, it has proved indispensable to professional biologists and students alike. Now reissued in paperback with an updated preface by the authors, Biology of Amphibians remains the standard work in its field.

Atlantic Spain and Portugal, RCC Pilotage Foundation, Rod Heikell, Oz Robinson, Mike Sadler, 1995, 0852882548,
Health Promotion in Practice is a practice-driven text that translates theories of health promotion into a step-by-step clinical approach for engaging with clients. The book covers the theoretical frameworks of health promotion, clinical approaches to the eleven healthy behaviorseating well, physical activity, sexual health, oral health, smoking cessation, substance safety, injury prevention, violence prevention, disaster preparedness, organizational wellness, and enhancing developmentas well as critical factors shaping the present and the future of the field. Written by the leading practitioners and researchers in the field of health promotion, Health Promotion in Practice is a key text and reference for students, faculty, researchers, and practitioners."Finally, a signature book in which practitioners of health promotion will find relevant guidance for their work. Sherri Sheinfeld Gorin and Joan Arnold have compiled an outstanding cast of savvy experts whose collective effort has resulted in a stunning breadth of coverage. Whether you are a practitioner or a student preparing for practice, this book will help you to bridge the gap between theory and practice-driven empiricism."John P. Allegrante, professor of health education, Teachers College, and Mailman School of Public Health, Columbia University"The models of health promotion around which Health Promotion in Practice is built have a sound basis in current understanding of human development, the impact of community and social systems, and stages of growth, development, and aging. This handbook can provide both experienced health professionals and students beginning to develop practice patterns the content and structure to interactions that are truly promoting of health."Kristine M. Gebbie, Dr.P.H., R.N., Columbia University School of Nursing

ESS Profiles, Noel Shields , 2002, 0958182507, 9780958182508.

Mechanised Force: British Tanks Between the Wars, David Fletcher , 1991, 0112904874, 9780112904878. A history of the Tank Corps from 1919 up until the time when, as the Royal Tank Regiment, it went to war again in 1939. It chronicles the many exciting events and innovations of the years between the wars, the truly formative years of tank design.

In 1991 Linda Moss and Scott Reade were brought together by a destiny even they could not understand. Their lives were changed forever in that moment, for a crack was made in the wall of time and they were compelled to pass through the opening. This is a true story about a life the authors shared nearly 400 years ago. The things related here are memories, not myths or fairy tales. The purpose of the book is to pass down revelations and the prophesies given in vision so long ago to you, so that they will be remembered.

This collection of primary sources includes both classic and lesser-known documents describing the rich mosaic of American life from the pre-contact era to the present day. The sources, both public and private documents ranging from letters, diary excerpts, stories, novels, to speeches, court cases, and government reports tell the story of American history in the words of those who lived it.

Chaos comes to Myrridia's immediate neighbors when the King of Esterlyn passes away after a long illness and the 2-year-old King of Wyckendom is murdered in his cradle on the same day. The heir to Esterlyn, 12-year-old Frederich DiStephane, is abducted as his uncle prepares to usurp the throne, while an unexpected heir to Wyckendom, Katharine Severinson, appears at that royal castle. In the midst of these events, Frederich's young friends mount a search party, uncaring of the potential dangers to themselves, and traverse the length of Myrridia in pursuit. Shadows of past events continue to threaten the present as those with power in Myrridia work to rescue Frederich and aid him in claiming his inheritance. New Magical talents are discovered. Is belief in a just cause plus determination enough to overcome seemingly impossible odds, or does it take more...including a willingness to sacrifice oneself?

Contemporary social problems, Robert King Merton, Robert A. Nisbet, 1976, 015513793X, 9780155137936. The student is introduced to the sociologist's approach to problems involving deviant behavior, family disorganization, and social dysfunctions.

Fantasy art instruction continues to be a best-selling genre, and books that focus on drawing and painting fantasy creatures sell very well. Author Emily Fiegenschuh works in a sophisticated yet approachable style in the vein of DragonArt and Dracopedia. 25+ step-by-step demonstrations Throughout this book, artists of all skill levels will bring fantasy creatures to
life as they learn to draw and paint their favorites step by step. By using a "field-guide" approach, author Emily Fiegenschuh starts readers out with an introduction to materials and basic tips on using reference and finding inspiration for creating creatures. She then progresses to more than 25 step-by-step demonstrations on the basics of sketching and drawing various fantasy characters, and finally shows readers how to add color to finished sketches with gouache.

The Journal of Watkin Stench, Meredith Hooper, 2000, 0340757337, 9780340757338. A rat's-eye view of the First Fleet arriving in Botany Bay, Australia in 1788; the talkative young pioneer rat, Watkin, records the antics of the humans. Shortlisted for the Carnegie Medal.

The San Pedro River: A Discovery Guide, Roseann Beggy Hanson, 2001, 0816519102, 9780816519101. The San Pedro River in southeastern Arizona not only features some of the richest wildlife habitat in the Southwest, it also is home to more kinds of animals than anywhere else in the contiguous United States. Here you'll find 82 species of mammals, dozens of different reptiles and amphibians, and nearly 400 species of birds more than half of those recorded in the entire country. In addition, the river supports one of the largest cottonwood-willow forest canopies remaining in Arizona. It's little wonder that the San Pedro was named by the Nature Conservancy as one of the Last Great Places in the Northern Hemisphere, and by the American Bird Conservancy as its first Important Bird Area in the United States. Roseann Hanson has spent much of her life exploring the San Pedro and its environs and has written a book that is both a personal celebration of and a definitive guide to this, the last undammed and unchanneled river in the Southwest. Taking you from the San Pedro's entry into the U.S. at the Mexican border to its confluence with the Gila River about a hundred miles north, she devotes a separate chapter to each of seven sections of river. Each chapter contains an eloquent essay on natural and cultural history, laced with Hanson's own experiences, plus an exploration guide brimming with useful information: how to get to the river, finding hiking trails, camping and other accommodations, birdwatching tips, access to biking and horseback riding, and nearby historic sites. Maps are included for each stretch of river, and the text is illustrated throughout with drawings from Roseann's copious field notebooks. Along the 40 miles of the San Pedro Riparian National Conservation Area, a sanctuary protected by the Bureau of Land Management since 1988, Hanson shows how the elimination of cattle and off-road vehicles has restored the river corridor to a more natural condition. She tells of the impact of humans on the San Pedro, from Clovis hunters to American settlers to Washington bureaucrats, and shows how, as the river winds its way north, it is increasingly threatened by groundwater pumping and urbanization. In
addition to the "discovery" sections of each chapter, Hanson has included species checklists for habitats and plants, birds, mammals, and reptiles and amphibians to make this a perfect companion for anyone exploring the area, whether as occasional tourist or frequent visitor. The book's blending of graceful prose and practical information shows that a river is the sum of many parts. Roseann Hanson will give you a special understanding and perhaps a sense of stewardship of this wild place.

Trails South: The Wagon-road Economy in the Dodge City-Panhandle Region, C. Robert Haywood, 2006, 0974622222, 9780974622224. History of the trails from Dodge City Kansas to points in Oklahoma and Texas used primarily for trade from 1880 through the turn of the century.

The Way it was: A Collection of Photos Taken by Ritchie County Photographer, Harvey H. Cox, Harvey H. Cox, 1989, 0962495409, 9780962495403.

Tailings management: problems and solutions in the mining industry, ISBN 0444417524, 9780444417527, G. M. Ritcey, 1989, 0444873740, 9780444873743. Environmentally, the past 10-15 years have experienced a very positive approach to improving the quality of effluents discharged from mining and milling processes, and ultimately the quality of seepage from the tailings impoundment area into the environment. This book assembles all the various aspects of the process and of tailings management which have an impact on the environment, thus providing significant examples to help those involved in tailings problems. The text is devoted to the many practical aspects of tailings management - the concerns, the problems, the solutions where knowledge exists, and the presentation of a methodology to examine mine and metallurgical wastes for the ultimate objective of designing the best disposal option for that particular site.

Performance Characteristics Profile of the North American IMS Fleet, United States Sailing Association, 2002, .

Cellular Telephone Fraud: Hearing Before the Subcommittee on Crime of the Committee on the Judiciary, House of Representatives, One Hundred Fifth Congress, First Session ... September 11, 1997, 1999, 0160583438, 9780160583438.

To the Ice: Images from the Antarctic, 2003, 0975120204, 9780975120200.

Principles of Contractual Interpretation, Richard Calnan, 2013, 0199681465, 9780199681464. This concise new book explains and re-evaluates the rules of construction at a conceptual level and explains clearly the principles which guide the courts in interpreting contracts and the associated practical implications. The work sets out the principles and considers each in turn providing examples of how they operate in practice. It covers difficult legal issues faced by the courts (such as the status of an agreement to agree) and the effect that these principles have on the drafting and reading of contracts. The purpose of the book is to give the reader an understanding of all of the issues which are involved in reading a contract. It therefore covers not just interpretation of contracts, but also the implication of terms and rectification.

HTML, XHTML, and CSS, Sixth Edition: Visual QuickStart Guide, Elizabeth Castro, 2006, 0132809818, 9780132809818. Need to learn HTML fast? This best-selling reference's visual format and step-by-step, task-based instructions will have you up and running with HTML in no time. In this completely updated edition of our best-selling guide to HTML, Web expert and best-selling author Elizabeth Castro uses crystal-clear instructions and friendly prose to introduce you to all of today's HTML and XHTML essentials. You'll learn how to design, structure, and format your Web site. You'll create and use images, links, styles, lists, tables, frames, and forms, and you'll add sound and movies to your site. Finally, you will test and debug your site, and publish it to the Web. Along the way, you'll find extensive coverage of CSS techniques, current browsers (Opera, Safari, Firefox), creating pages for the mobile Web, and more. Visual QuickStart Guide--the quick and easy way to learn! Easy visual approach uses pictures to guide you through HTML and show you what to do. Concise steps and explanations get you up and running in no time. Page for page, the best content and value around. Companion Web site at www.cookwood.com/html offers examples, a lively question-and-answer area, updates, and more.

Crossing America: A Reading and Writing Rhetoric, Deborah W. Hunt, Linda D. Patterson, 2008, 0131928732,
Crossing America is an interactive reading, writing, and grammar text that focuses on competencies that skilled readers and writers must master. The text follows a thematic approach designed to provide cultural knowledge and awareness both to native speakers of English and to the limited-English language population.

Mechanics of Materials, R. C. Hibbeler, 2014, 0133254429, 9780133254426. ALERT: Before you purchase, check with your instructor or review your course syllabus to ensure that you select the correct ISBN. Several versions of Pearson's MyLab & Mastering products exist for each title, including customized versions for individual schools, and registrations are not transferable. In addition, you may need a CourseID, provided by your instructor, to register for and use Pearson's MyLab & Mastering products. Packages Access codes for Pearson's MyLab & Mastering products may not be included when purchasing or renting from companies other than Pearson; check with the seller before completing your purchase. Used or rental books If you rent or purchase a used book with an access code, the access code may have been redeemed previously and you may have to purchase a new access code. Access codes Access codes that are purchased from sellers other than Pearson carry a higher risk of being either the wrong ISBN or a previously redeemed code. Check with the seller prior to purchase. -- For undergraduate Mechanics of Materials courses in Mechanical, Civil, and Aerospace Engineering departments. Containing Hibbeler's hallmark student-oriented features, this text is in four-color with a photorealistic art program designed to help students visualize difficult concepts. A clear, concise writing style and more examples than any other text further contribute to students' ability to master the material. This edition is available with MasteringEngineering, an innovative online program created to emulate the instructor's office-hour environment, guiding students through engineering concepts from Mechanics of Materials with self-paced individualized coaching. Note: Mastering is not a self-paced technology and should only be purchased when required by an instructor. 0133409325 / 9780133409321 Mechanics of Materials Plus MasteringEngineering with Pearson eText -- Standalone Access Card Package consists of 0133254429 / 9780133254426 Mechanics of Materials 9/e 0133402738 / 9780133402735 MasteringEngineering with Pearson eText -- Standalone Access Card -- for Mechanics of Materials

One Life, Two Stories: Nancy de Vries' Journey Home, Nancy de Vries, Nancy de Vries, Gaynor MacDonald, Jane Mears, Anna Nettheim, 2012, 1921364254, 9781921364259. Within her pain and loneliness, Nancy found the passion, humour and courage to speak out against the bureaucrats who wrenched her from her mother aged 13 months. This unique book starkly contrasts Nancy's story with that of those bureaucrats, holding them accountable. 'It must never happen again', she said. But it does. Are we ready to listen, to bear witness?

The Practice Test, Edwin Leap, 2010, 160910613X, 9781609106133. The Practice Test is a book of questions written in a sometimes humorous imitation of medical board exams. However, rather than addressing the science of medicine, The
Practice Test asks (and answers) questions about life as a physician. It is a book written to help future and current physicians to develop, or rediscover, balance, perspective and joy in their lives and in the practice of their chosen profession.
